

Specific Objectives

1. Develop a set of test cases for a medium-sized software project in order to properly implement the tests.

Student Outcome

3. Communicate effectively in a variety of professional contexts.

Description

Each software engineering team must investigate about the software testing standards in ISO/IEC/IEEE 29119 [1]. This research must be presented in a 9-minute demonstration based on the topics assigned below.

Software and systems engineering —Software testing — Part 1: General concepts

- Team 1: Sections 4.1 and 4.3
- Team 2: Sections 4.4 to 4.7

Software and systems engineering —Software testing —Part 2: Test processes

- Team 3: Sections 4 to 7
- Team 4: Section 8

Software and systems engineering —Software testing —Part 3: Test documentation

- Team 5: Section 4 to 6
- Team 6: Section 7
- Team 7: Section 8

Deliverables

1. A file (**in pdf**) written in English with the presentation used in the demonstration.
2. Each student must submit an evaluation of other team members using the co-evaluation scheme in the individual assignment “Assignment Co-evaluation”, available in Aula Virtual.

Marking Scheme

Presentation	Weight
Demonstration of comprehension of the content	40
Quality of the narrative and clarity	40
Capture of audience engagement	20
Total	100
Penalties	
Non-compliance with a delivery standard or specification	-100
Each grammatical or orthographic error (maximum 20 mistakes)	-04
Non-compliance with the corresponding co-evaluation assignment (individual involvement)	-50

Late Submission Policy

Delay (§)	Penalty (Ω)
1 minute or less	loss of 10%
1 to 6 minutes	loss of 20%
6 to 24 minutes	loss of 30%
Over 24 minutes:	loss of 100%

(§) every clock hour counts including weekends or holidays.

(Ω) automatic and non-negotiable penalty.

Assessment Criteria for Student Outcome 3

Criteria	Unsatisfactory	Developing	Satisfactory	Exemplary
Oral and Written Presentation Structure	Lacks logical organization. It shows some coherence, but ideas lack coherence. Vocabulary is limited, casual, and colloquial.	Some information presented in logical sequence. Some points remain displaced and stray from the topic. Vocabulary is sometimes vague.	Is coherent and logically organized. Transitions used between ideas and paragraphs to create coherence. Vocabulary is clear.	Shows high degree of attention to logic and reasoning of points. Clearly leads the reader/listener to the conclusion and stirs thought regarding the topic. Vocabulary is highly appropriate for the context. It is very clear.
Written presentation /Task achievement	Is not logical, Ideas are present with details that may be irrelevant, inappropriate, or inaccurate. Continuous errors in spelling, grammar, syntax and/or punctuation making it difficult to read.	Is logical and solid. Ideas are present but could be more fully extended. Shows a pattern of errors in spelling, grammar, syntax and/or punctuation.	Is well-presented. Ideas are detailed, developed and supported. Has a few errors in spelling, grammar, syntax and punctuation.	Is exceptionally well presented and argued. Ideas are detailed, well developed and supported with specific evidence and facts. Is free of distracting spelling, grammar, syntax and punctuation errors.
Oral Presentation Fluency and Pronunciation	Speech is slow, hesitant & strained except for short, memorized phrases; inaudible. More than three mispronounced words	Speech is relatively smooth with some hesitation and unevenness. Volume wavers. No more than two mispronounced words.	Fluid speech; few hesitations; a slight search for words. Inaudible word or two. No more than one mispronounced word.	Fluid speech; few to no hesitations; no attempts to search for words. Volume is excellent. No mispronounced words.
